

Assignment -4

Docker and Kubernetes

| | |
|---------------------|------------------|
| Assignment Date | 09 November 2022 |
| Student Name | Praveen. K |
| Student Roll Number | 821019104031 |
| Team id | PNT2022TMID46608 |

1. Pull an image from docker hub and run it in docker Playground

The screenshot shows two browser windows. The top window is Docker Hub, displaying the repository page for `uifd/ui-for-docker`. It indicates the repository is deprecated and suggests using `portainer/portainer`. The Docker Pull Command is shown as `docker pull uifd/ui-for-docker`.

The bottom window is Docker Playground, showing a session with IP `192.168.0.13`. The terminal output shows the successful execution of the `docker pull` command, pulling the `uifd/ui-for-docker:latest` image. The terminal also displays the command to run the container with `docker run -d -p 9000:9000 --privileged -v /var/run/docker.sock:/var/run/docker.sock uifd/ui-for-docker`.

```
# This is a sandbox environment. Using personal credentials
# is HIGHLY discouraged. Any consequences of doing so are
# completely the user's responsibilities.
#
# The PWD team.
